Shobhit Srivastava

Software Engineer || ReactJS || Python || Google Cloud Certified: Professional Cloud Architect & Developer || Ex-Intern @HighRadius || SRMIST

Lucknow, Uttar Pradesh, India

Summary

I'm a Software Engineer at Valiance Solutions, passionate about building scalable, secure, and impactful cloud-native solutions. With a Bachelor's in Computer Science and Engineering (Specialization: Cloud Computing), I bring deep expertise in distributed systems, cloud architecture, and AI-driven innovation.

Recently, I achieved the Google Cloud Professional Cloud Developer certification, adding to my existing Professional Cloud Architect credentials. This journey enhanced my understanding of designing resilient architectures, managing containerized and serverless deployments, and implementing robust CI/CD pipelines.

My focus lies in creating reliable, high-performance systems that power digital transformation. I thrive in challenging environments, equipped with a problem-solving mindset, a drive for continuous learning, and a commitment to delivering quality solutions.

Whether it's orchestrating scalable systems or contributing to AI for Governance, I'm dedicated to making a meaningful impact.

Experience

Valiance Solutions

3 years

Software Engineer

June 2024 - Present (2 years 3 months)

Noida, Uttar Pradesh, India

Software Engineer Intern

September 2023 - May 2024 (9 months)

Noida, Uttar Pradesh, India

HighRadius

Internship Program

January 2022 - April 2022 (4 months)

- In this Program, I have successfully developed and deployed an AI-enabled Fintech B2B Cloud Application as part of this program.
- My involvement included creating a full-stack web-based product, which provided me with comprehensive insights into every aspect of product development. This encompassed identifying user requirements, designing an exceptional user experience, constructing relevant data models and machine learning models, as well as implementing UI components and backend design.
- By gaining proficiency in these areas, I have acquired a well-rounded skill set to deliver innovative and user-friendly solutions in the Fintech industry.

Information Technology Trainee

August 2021 - September 2021 (2 months)

Lucknow, Uttar Pradesh, India

- The project comprised two main components: "HTML and CSS Validation for Websites" and "Creating a Machine Learning-Based Chatbot Using Python."
- The primary objective of the HTML and CSS Validation for Websites Project was to assess the compliance status of specific websites, determining whether they adhered to established standards or exhibited non-compliance.
- The goal of the "Creating Machine Learning-Based Chatbot Using Python" project was to train a language model using Python's machine learning libraries. The chatbot aimed to enhance user interaction by generating contextually relevant responses, providing efficient and accurate automated assistance. By leveraging machine learning techniques, the chatbot aimed to deliver an enhanced user experience.

Education

SRM University

Bachelor of Technology - BTech, Computer Science · (2019 - 2023)
